◇ vimeansam2017@gmail.com ◇ [LinkedIn](#) ◇ [GitHub](#) ◇ [Portfolio](#)

OVERVIEW

Versatile **Full-Stack** and **Mobile Software Engineer** with specialized experience delivering high-impact features for an AI-powered **EdTech** platform built for micro-learning, collaboration, and continuous skill development.

EDUCATION

San Francisco State University

Bachelors of Science, Computer Science (GPA: 3.69 / 4.00)

San Francisco, CA

2015 – 2019

WORK EXPERIENCE

Edduus

Full Stack Engineer

Remote

Sep 2020 – **Present**

- Spearheaded 0-to-1 development of a cross-platform education mobile app using **React Native**, integrating **OpenAI** and peer-driven Q&A articles, Google Cloud **Firestore** for real-time messaging and scalable video uploading/streaming using **AWS S3**.
- Constructed an **AI**-powered Progressive Web App (**PWA**) using **React.js** and **Vite** to deliver skill analysis and motion feedback from uploaded videos.
- Architected a responsive **React.js** SaaS platform featuring **Redux** for state management and a secure **Stripe**-integrated payment system for digital learning materials and community subscriptions.
- Designed and deployed a scalable **Node.js MVC** architecture utilizing **PostgreSQL** and **MongoDB** to support diverse server-side workflows.

Ultimo Software Solutions, Inc.

Software Engineer Intern

Union City, CA

Jan 2020 – Mar 2020

- Implemented and Integrated API flows that connects to various web services (**REST, SOAP**) and database systems using **MuleSoft**.
- Operated **Oracle NetSuite** Cloud ERP to connect, retrieve, modify, and create data between **Java** applications.
- Utilized **Salesforce** platform to create, connect, and modify data using **Apex code, SOQL, and SOSL** language.

PROJECTS

6-Card Golf

- Engineered a real-time, multiplayer web application in **React.js** and **Node.js** to enable remote gameplay during social distancing.
- Implemented **Socket.io** to synchronize event communications for live game states across multiple clients.
- Designed a flexible **MongoDB** schema to securely persist user profiles, active game sessions, and match data.
- Deployed the full-stack application to **AWS**, configuring **NGINX** as a reverse proxy.

SKILLS

Languages

JavaScript (Node.js, React.js, React Native, Next.js), TypeScript, Python, PHP, HTML/CSS, Java, SQL/No-SQL

Tools

Visual Studio Code, Microsoft Office, Linux/Ubuntu, AWS Cloud Services, NGINX

Soft Skills

Creative, collaborative, flexible, hard-working
